

Ref.2815 PRIUM 10.5 mm

The Prium uses a polyester sheath for low elongation and increased resistance to the effects of humidity, dirt and dust. The super strong polyamide core combines with the 32 carrier sheath for good handling and twisted yarns for a very high level of abrasion resistance. The suppleness of the Prium 10.5 mm makes it a great choice for use with ascenders and descenders.

ROPE ACCESS TEAM RESCUE TREE CLIMBING GENERAL

Polyamide Core
with 16 strands

High static strength (31 kN)

Polyester Sheath
with 32 carrier

Very low elongation

Available in White/Red colour.

Lenghts: Ref.**2815-501**: 50 m
Ref.**2815-2001**: 200 m
Ref.**2815-6001**: 600 m

Sheath is made with **twisted yarn**, which improve abrasion, resistance and durability of the rope
